

BER+ Board Room

Data-driven transparency · ecosystem coordination probe

Tian Shao · Yushu Qin · Yi Li

XU University of Applied Sciences · IDI S26 · June 2026

Live prototype: <https://ber-board-room.vercel.app/>

1. Course objective & problem

Objective (not a final strategy). We explore opportunities, challenge assumptions, and offer *actionable impulses* for BER+ — not a finished regional strategy.

The corridor pain. Land, grid, logistics, and programme milestones sit in PDFs and member decks — never on one map. Members see their own sites but not what is *in play* nearby.

Our story. Data-driven transparency: a neutral BER+ briefing platform with labelled indicative evidence on one map before site visits and contracts.

2. The Board Room prototype

BER+ Board Room is a live web probe: MapLibre corridor map, 14 Mitglieder, OSM Intel, Pilot-1 timeline, stakeholder matching, bilingual welcome, guided walkthrough.

Figure 1: Welcome — team, audience URL, bilingual Board Room explainer (Playwright, desktop).

Three demo walkthroughs on <https://ber-board-room.vercel.app/>:

- **Company** — OSM land, developer focus, matching intro.
- **Investor** — Mitglieder density, hectares, benchmark teleport.
- **Municipality** — briefing + infrastructure layers (indicative only).

3. Stakeholder signal — Thomas Graf (Alpine Immobilien)

Context. After the June presentation, **Thomas Graf** (Geschäftsführer, Alpine Immobilien GmbH; BER+ 2. Vorsitzender; developer of the BB Business Hub, Schönefeld) asked about **employee numbers** of firms near

Figure 2: Board Room map — corridor ribbon, Pilot-1, Mitglieder zones, programme timeline.

OSM Intel

Mitglieder

Matching map

Schönefeld — whether a new project there would have enough “manpower” to succeed.

Reframing (EN / DE).

- **Not** primarily: construction or factory labour on site.
- **Rather:** *Beschäftigungstiefe* — how many jobs and firms already exist; can new **Büro/Gewerbe** attract tenants; can those tenants recruit **Fachkräfte** in the corridor (Alpine’s core leasing question).

Graf himself cites the campus proof point: ~**50 companies**, ~**800 employees** at BB Business Hub (BER+ news, Feb 2025). The 2025 **FBB/WFBB/IHK** Flughafenregion labour study notes strong employment growth but **Fachkräftegewinnung** as the top business challenge — mobility and the wider Berlin–Brandenburg catchment (~6M) matter as much as local headcount.

Board Room response. Show Mitglieder, gewerbe/OSM layers, and corridor links on one map; label data *indicative*. Verified firm-level **Beschäftigtenzahlen** would need a BER+ member validation pass (pilot: Alpine + 3–5 anchor Mitglieder) — transparency before strategy, not a finished labour-market GIS.

4. What BER+ must run (pilot phase)

BER+ must **collect** member data, **validate** locations, **define** ownership & refresh rules, **maintain** quarterly OSM snapshots, and **host** the neutral Board Room. Phase I anchors on Pilot-1 (SEGRO / Schönefeld Nord).

5. Team recommendations

Pursue: host Board Room as briefing surface; pilot 3–5 verified member–asset links; quarterly OSM refresh; Inquiry Ledger from matching “Save”.

Deprioritize: cadastral GIS replacement; single-member walled gardens; unverified claims as authoritative.

Next step (90 days): board MOU for hosting + one recorded briefing with a Pilot-1 decision on the shared map.

Sources: OSM via `/api/osm/schoenefeld`; benchmarks (Amsterdam Airport City; Schiphol AAA / ISOCARP 2021; VLAIO / Geopunt); BER+ member materials; Thomas Graf / Alpine (BER+ Koepfe interview; BB Business Hub news); FBB/WFBB/IHK labour study Flughafenregion 2025.

Map figures: curated app captures (`docs/presentation/figures`); welcome screen: Playwright E2E.
